

CHAIN OIL

PERFORMANCE PLUS® chain oils are designed to lubricate and extend the component life of chainsaw chains, drive chains, chain conveyors, and other applications requiring a non-drip, tacky lubricant. They are formulated with a tackiness additive which reduces throw-off and drippage from moving parts, and are dyed red to identify the presence of oil.

The foundation of Performance Plus Oils are Kleen Performance Products' hydro-treated, high VI base oils.

TYPICAL PROPERTIES			
VISCOSITY GRADE	Light-32	Medium-68	Heavy-110
Color	Red	v	Red
Specific Gravity 15.6°C (60°F)	0.862	0.859	0.870
Kinematic Viscosity cSt @ 40°C	31.8	69.9	121.6
Flash Point, °C	229	249	260
Pour Point, °C	-36	-33	-24
Tackifier	Yes	Yes	Yes

Note: Values shown above are representative of current production and may vary within modest ranges
